

RONDA TIME CENTER

*Your Experts
for Swiss Watch
Assembly*

Our watchmakers work with great care and attention to detail.

Distinctive Timepieces

Individual engravings transform your watches not only into originals, they also make them look elegant and protect well against counterfeits.

We process your watches with state-of-the-art laser technology that is highly precise.

- High-quality engravings on oscillating weights, case backs, sapphire glass, movements and watches
- Individual and multicolored designs
- Show your logo in upright position on screwed-down case backs
- Finish your limited editions with progressive serial numbers

Felix Rudin
Managing Director

A Swiss Made Watch is Created

After a complete factory changeover, experienced micro-teams in four production cells assemble your Swiss Made watches from A-Z.

This shortens the lead time and ensures that the finished timepieces reach you even faster. Upon request, we will procure the Ronda movements or refine these with an exquisite decor. You can also benefit from various services. Thanks to the versatility of our employees, we can adapt and respond extremely flexible to customer requirements.

Laser engravings with a rainbow effect enable such an iridescent finish.

Watch the Laser in action:

“Your Watch Brand benefits from *outstanding services* and a highly motivated Team.”

Added Value

Refine your models with exclusive decor and significantly increase the value of your watches! Creations with a glass case back provide a direct view of the high-quality perlage finish.

Decorated movements are an exclusivity which we offer to brand manufacturers when they have their watches assembled by us.

2002

Two decades ago, Ronda expanded its range of services.

The logical step was to offer to brand manufacturers not only watch movements but also full Swiss Made watch assembly services.

Ronda Time Center is a leader in the assembly of Swiss watches. We maintain a close partnership with our customers and our comprehensive value-added benefits allow us to offer high quality at attractive conditions.

Production site in Stabio since 2008
