You have decided to buy a watch, which was assembled by a watchmaker using a Ronda movement. Please note that no watches are produced or distributed under the Ronda Brand.

In case of repairs, guarantee claims and questions concerning the functioning of a watch, purchasers and consumers should contact their retailer or the watch manufacturer, for which the relevant information can be found in the sales or guarantee documentation provided with the watch.

**Description of the display and control buttons**

**Setting the time**

1. Pull out the crown to position III (the watch stops).
2. Turn the crown until you reach the correct time 8:45.
3. Push the crown back into position I.

**Please note:**
- *In order to set the time to the exact second, **must be set to the date of the following day.* During the date changing phase between approx. 08.30 PM and midnight; the date must be pushed back into position I before the next date appears.
- Please refer to the chapter entitled "Intermediate or interval timing." (The watch continues to run).

**Setting the date (quick mode)**

1. Pull out the crown to position III (the watch continues to run).
2. Turn the crown anticlockwise until the correct date 01 appears.
3. Push the crown back into position I.

**Please note:**
- *During the date changing phase between approx. 08.30 PM and midnight; the date must be set to the date of the following day.*

**Setting the time/date**

**Example:**
- **Date / time on the watch:** 1:25 AM
- **Present date / time:** 1:20 AM
- **1:25 AM**

1. Pull out the crown to position III (the watch continues to run).
2. Turn the crown until the correct date appears.
3. Push the crown back into position I.

**Please note:**
- **To set your watch to the exact second, please refer to the chapter entitled "Intermediate or interval timing."**
- **Please observe the 24-hour clock system.**

**Chronograph: Basic function**

**Example:**
1. Start: Press push-button A.
2. Stop: To stop the timing, press push-button A once more and read the chronograph counters: 60 / 20 min / 30 sec.
3. Zero positioning: Press push-button B.

(The chronograph hands will be reset to their zero positions.)

**Chronograph: Accumulated timing**

**Example:**
1. Start: (start timing)
2. Stop: *approx. 08.30 min B sec following 1.
3. Reset: (timing is resumed)
4. Stop: *approx. 09.12 min B sec following 3.

(The accumulated time is shown)

**Reset:**
- The chronograph hands are returned to their zero positions.

**Please note:**
- *Following 1, the accumulation of the timing can be continued by pressing push-button A.
- **Reset:** (Stop / Reset / Stop / ...)

**Chronograph: Intermediate or interval timing**

**Example:**
1. Start: (start timing)
2. Display interval: *approx. 20 minutes 17 seconds (timing continues in the background)*
3. Making up the measured time: (the chronograph hands are quickly advanced to the ongoing measured time.)
4. Stop: (final time is displayed)
5. Reset: *The chronograph hands are returned to their zero position*

**Please note:**
- *Following 1, further intervals or intermediate can be displayed by pressing push-button B (display interval / make up measured time, ...)

**Adjusting the chronograph hands to zero position**

**Example:**
- One or several chronograph hands are not in their correct zero positions and have to be adjusted (e.g. following a battery change).

1. Pull out the crown to position III (a chronograph hand is in position 01).
2. Keep push-buttons A and B depressed simultaneously for at least 2 seconds (the second counter hand rotates by 360° – correction mode is activated.)

**Please note:**
- *The accumulated measured time is shown*
- *Timing is resumed*

**Adjusting the second counter hand**

Single step: *1 s short*
Continuous: *long*

**Adjusting the next hand**

**Adjusting the minute counter hand and the hour counter hand** (mechanical coupled)

Single step: *1 s short*
Continuous: *long*

**Returning the crown to position I**
- Termination of the chronograph hands adjustment can be carried out at any time.)

**Battery type:** 384/SR41SW

**Accuracy:** ±20 / ±10 seconds per month
