Description of the display and control buttons

Display elements
- Minute hand
- Hour hand
- Alarm and reference time (hour and minute)
- Second hand
- Date

Control buttons
- Crown
- Push-button

Setting the time
1. Pull out the crown to position III (the watch stops).
2. Turn the crown until you reach the correct time 8:45.
3. Push the crown back into position II.

Please note:
* In order to set the time to the exact second, must be pulled out when the second hand is in position 00. Once the hour and minute hands have been set, must be pushed back into position II at the exact second.

Setting the time (quick mode)
1. Pull out the crown to position III (the watch continues to run).
2. Turn the crown until the correct date appears.
3. Push the crown back into position II.

Please note:
The date of the following day must be set in the calendar changing phase between approx. 3 PM and midnight.

Setting the reference time
1. Pull out the crown to position III (second hand stops. The display changes from alarm time to reference time).
2. Activating the setting mode
   - Press the push-button for at least 2 seconds. An arrow at the small minute hand jumps forward one minute, this mode is active.
3. Setting
   - Short pressing (less than 1 second): the alarm time is moved forward or backward by the minute.
   - Long pressing (longer than 2 seconds): the alarm time is moved forward until the push-button is released.

Please note:
* If the push-button is not activated for 10 seconds, the setting mode of the alarm time deactivates itself. At the same time, 2 beeps are emitted to indicate that the alarm is switched on.

Switching the alarm on/off
1. The alarm is switched on/off by briefly pressing the push-button.
   - 2 beeps → alarm switched on
   - 1 beep → alarm switched off

Please note:
The alarm can be set maximum 12 hours before the desired alarm time.

Once the set alarm time has been reached, a signal is emitted for 10 seconds. This signal is repeated after two minutes. Following the normal operation of the push-button, the signal is immediately switched off.

What is the reference time?
The current time is displayed by means of the hour and minute hand.

Parallel to the current time, the reference time runs in the background. The alarm time refers itself to this reference time. Thus, resetting the current time also requires the identical correction of the reference time.

If the reference time is not synchronised with the current time, this results in the alarm signal being emitted at a different time to the set alarm time.

Example:
- Date / time on the watch:
  - Reference time:
    - Current time: 12:45 AM / 8:30 PM
    - Representative time:
      - 12:25 AM

Please note:
Resetting the time also requires the identical correction of the reference time.
Please refer to setting the reference times.
* Please observe the AM/PM-clock rhythm.

Reference time
- Date
- Time
- Alarm tone

Alarm time
- Date
- Time
- Alarm tone

Setting the reference time
1. Pull out the crown to position III (second hand stops. The display changes from alarm time to reference time).
2. Activating the setting mode
   - Press the push-button for at least 2 seconds. An arrow at the small minute hand jumps forward one minute, this mode is active.
3. Setting
   - Short pressing (less than 1 second): the reference time is moved forwards by the minute.
   - Long pressing (longer than 2 seconds): the reference time is moved forwards until the push-button is released.

Please note:
The reference time must display the same time as the current time. This means that resetting the current time also requires the identical correction of the reference time. Afterwards, the alarm time has to be reset.
