Description of the display and control buttons

Display elements
- Minute hand
- Hour hand
- Second counter
- Minute counter
- Date

Control buttons
- Push-button A
- Crown
- Push-button B

Setting the time
1. Pull out the crown to position III (the watch stops).
2. Turn the crown until you reach the correct time 8:45.
3. Push the crown back into position I.

Please note:
- In order to set the time to the exact second, it must be pulled out when the second hand is in position 6:00.
- Once the hour and minute hands have been set, they must be pushed back into position I at the exact second.

Setting the date (quick mode)
1. Pull out the crown to position I (the watch continues to run).
2. Turn the crown until the correct date appears.
3. Push the crown back into position I.

Please note:
- During the date changing phase between approx. 9 PM and midnight, the date must be set to the date of the following day.
- An incorrect date setting with quick mode can induce a false date indication. The synchronization is re-established by setting the date from 01.01.31 (crown in position II).

Setting the date/time
Example:
- Date: 05.08.2022
- Time: 12:25 PM
- Present date/time: 05.08.2022 12:25 PM

1. Pull out the crown to position B (the watch continues to run).
2. Turn the crown until yesterday's date appears.
3. Push the crown back into position II.

Please note:
- To set your watch to the exact second, please refer to the chapter entitled "Setting the time."
- Please observe the AM/PM clock rhythm.

Chronograph: Basic function
Example:
1. Start: Press push-button A.
2. Stop: To stop the timing, press push-button A once more and read the chronograph counters: 46 / 20 min / 36 sec.
3. Reset: Press push-button B.

Zero positioning:
- Press push-button A.

(The chronograph hands will be reset to their zero positions.)

Chronograph: Accumulated timing
Example:
1. Start: (start timing)
2. Stop: approx. 9 PM and midnight; the date must be reset to the subsequent day
3. Reset: (time is displayed) The chronograph hands are returned to their zero position.

Please note:
- Following A, the accumulation of the timing can be continued by pressing push-button A.
- Start / Stop / Reset: ...

Chronograph: Intermediate or interval timing
Example:
1. Start: (start timing)
2. Display interval: approx. 60 minutes + 17 seconds (timing continues in the background)
3. Making up the measured time: (The chronograph hands are quickly advanced to the ongoing measured time.)
4. Stop: (final time is displayed)
5. Reset: The chronograph hands are returned to their zero position.

Please note:
- Following A, further intervals or intermediate can be displayed by pressing push-button B (display inter/ make up measured time...)

Adjusting the chronograph hands to zero position
Example:
One or several chronograph hands are not in the correct or incorrect zero position.

1. Pull out the crown to position III (all chronograph hands are in their correct or incorrect zero position).
2. Keep push-buttons A and B depressed simultaneously for at least 2 seconds (the second counter hand rotates by 360° – correct mode is activated).

Adjusting the second counter hand
Single step A: 1 x short
Continuous A: long

Adjusting the minute counter hand and the four counter hand (mechanical manual coupled)
Single step A: 1 x short
Continuous A: long

Returning the crown to position I
Termination of the chronograph hands adjustment: can be cancelled at any time.

Battery type: 395 / SR927SW
Accuracy: ±20 / ±10 seconds per month
