Description of the display and control buttons

Setting the time

1. Pull out the crown to position B (the watch stops).
2. Turn the crown until you reach the correct time 8:45.
3. Push the crown back into position L.

Please note:
- In order to set the time to the exact second, the second hand must be pushed back into position L at the exact second.
- The crown, the hour, minute, and second hands have been set.

Setting the date (quick mode)

Example after a change of month:
- Date on watch: 31
- Current date: 1
- Press the corrector C once to adjust the date 1 day forward.

Please note:
- This date for the following day must be set during the date changing phase between approx. 0:00 PM and 0:00 AM

Setting the time, date, day of week and month

Example:
- Date on watch: 10:40 – 11:45 AM
- Current: 20:22 – 11:30 PM
- Pull out the crown to position B (the watch stops).
- Turn crown until the current time is shown.
- Push crown to position L (watch continues to run).

Please note:
- * To set your watch to the exact second please refer to the chapter entitled Setting the time
- ** Please observe the AM/PM clock rhythm

Chronograph: Basic function

Example:
1. Start: Press push-button A.
2. Stop: Press push-button A again or read the chronograph counters.

Zen position:
- (The chronograph hands will be reset to their zero position.)

Chronograph: Accumulated timing

Example:
1. Start: Press push-buttons A and B.
2. Stop: Press push-button B.
3. Reset: The chronograph hands are returned to their zero position.

Please note:
- * Following (i) the accumulated timing can be continued by pressing push-button B.

Chronograph: Intermediate or interval timing

Example:
1. Start: Press push-button A.
2. Display interval: approx. 50 minutes 17 seconds (timing continues in the background)
3. Operating the measured time: (The chronograph hands are quickly advanced in the ongoing measured time.)
4. Stop: Final time is displayed.

Please note:
- * Following (i) Further intervals or intermediate can be displayed by pressing push-button B.

Adjusting the chronograph hands to zero position

Example:
- One or several chronograph hands are not in their correct zero positions and have to be adjusted (e.g., following a battery change).
- Pull out the crown to position B (all chronograph hands are in their correct or incorrect zero position).

Please note:
- * Keep push-buttons A and B depressed simultaneously for at least 2 seconds (the second counter hand rotates by 360°—corrective mode is activated).

Battery type: 395 / SR927SW
Accuracy: +20 / –10 seconds per month
